

Our Signature Louvered Floor Vents are crafted from the same French Oak flooring used in your home, ensuring a seamless and elegant match. Designed for both vertical and horizontal placement, they integrate effortlessly with your décor. Featuring a modern, minimalist aesthetic, our vents blend naturally into the hardwood floor rather than standing out.

Whenever possible, we manufacture each vent from the same floorboard being installed, ensuring a perfect grain match for a cohesive look. The louvers and interior back portion are painted flat black to minimize light reflection and maintain a discreet appearance. For optimal results, we also recommend painting the metal ductwork flat black to keep it concealed behind the louvers.
