

Benefits of Staining the Tongue in our Bespoke Wood Floors

At **Signature**, we take pride in the attention to detail and craftsmanship that goes into every hardwood floor we create. One of the distinctive features of our floors is the **stained tongue**, which offers several benefits:

1. **Enhanced Aesthetic Appeal** – When small gaps form between the planks due to natural expansion or contraction during seasonal changes, the stained tongue ensures a seamless and consistent appearance, preventing raw, lighter wood from showing and maintaining the elegant look of your floor.
2. **Uniform Finish** – The stained tongue guarantees that color consistency is maintained across the floor, even if slight gaps appear. This creates a **flawless**, cohesive look throughout the entire installation.
3. **Invisible Gaps** – In mosaic or patterned floor installations, where the tongue and groove may be visible, our stained tongue helps prevent light-colored streaks from appearing along the seams, preserving the beauty and integrity of the floor.
4. **Commitment to Quality** – At Signature, we understand that our clients expect the highest level of craftsmanship. By staining the tongue of our floors, we ensure **premium quality** and meticulous attention to detail, making every installation a standout feature in your space.
5. **Durability & Longevity** – Staining the tongue helps protect the floor from wear and tear that can occur during installation and ensures that it retains its refined, professional appearance for years to come.

By choosing **Signature**, you are investing in floors crafted with superior quality and careful attention to detail, ensuring that your floor installation stands out both in beauty and durability.
